CA Schedule

Cloud Computing

Due 11 Nov, 23:59
Assigned
This project should be submitted by end of week 9
Your task to design the architecture based on the requirements discussed in this document
You can use draw.io for designing the architecture
more tools can be found in
https://aws.amazon.com/architecture/icons/

Artificial Intelligence

Lab test week 8

Week 12 assignment submission / demo

Mobile software

Lab attendance 20%

Assignment 30% (yet to be given)

Software engineer

This assignment requires you to identify a simple web application and progress the system through its analysis and design phases using an object-oriented approach. An implementation of the design using Java Enterprise Edition as defined below is also required.

Deliverable 1 – Requirements & Design Document (due date: 4/11/18)
You must submit a single document containing your requirements, analysis and design models.
Deliverable 2 – Implementation (due date: 2/12/18)
 A fully working implementation of one of the use cases described in the requirements specification.

Client server programming

Week 8 Lab test

Class test week 10

Both 20%

Databases
